

Taking the Pulse of Wisconsin

SHOW
will be working in
Rock and
Janesville in
October and
November 2011.

We're the UW's Survey of the Health of Wisconsin. It's our job to travel the state to meet face-to-face with residents and to measure their health.

Our research study collects information that monitors the health of our neighborhoods, communities and families. We work to bring better health to the people of Wisconsin.
